PROFESSIONAL EXPERIENCE

- Having **3+ years** of experience in Software Industry with **Automation & Manual Testing**.
- Involved in Smoke Testing and Regression Testing of **Web (Selenium)** based applications
- Experience in working with **Agile Methodology**.
- Good knowledge of **SDLC, STLC, Bug Life Cycle**.
- Experience in working on **Retail Domain**.
- Good at **OOPS** and **Java** Concepts need in Selenium.
- Experience in working and contributing automation frameworks like **Hybrid**
- Good knowledge on **Page Object Model (POM)** for managing locators in Selenium Web driver
- Proficient in using **version control** tools like **GIT**
- Hands-on Knowledge in writing and executing the **Test Scripts** that modify existing software to correct errors and improve performance
- Prepared Test conditions by analyzing the given requirements from **Functional** and **Business** perspective.
- Test cases preparation, Defect Reporting, Test Execution and Test Report preparation with **JIRA**
- Proficient in presentations required for a **"Knowledge Transfer"**, which summarizes the project related work.
- Extensive experience in Smoke testing, Real testing, Retesting and Regression testing.
- Effectively interacted with off-shore & on-shore at workplace.
- Skilled in catching quality defects and reports bugs using different tools.
- Mentoring new team members.
- Handling Deliverables and allocating daily tasks to team.
- Excellent team player having ability to finish the tight deadlines and work under pressure.
- Self-starter, Self-Motivated and Quick Learner.
- Effective communication, interpersonal & collaboration skills.

EDUCATIONAL QUALIFICATION

- **B Tech** from **QIS College of Engineering & Technology, Ongole** with an aggregate of 69.79% in **2018**.

TECHNICAL SKILLS AND TOOLS

Automation Frameworks	Hybrid driven framework
Automation Testing Tools (Web)	Selenium Web Driver
Version Control tool	GIT
Defect tracking and Test Management Tool	JIRA
Programming Languages	Core Java
Office Tools	MS Office

WORK EXPERIENCE

COMPANY	DESIGNATION	DURATION
TCS	Software Engineer	August 2018 to March 31 2021

PROJECT PROFILE

Project 1:

Title : E-Commerce Web Automation
Client : Abercrombie & Fitch and Hollister- US

Description:

Abercrombie & Fitch is an American fashion brand retailer that focuses on upscale casual wear for young consumers. The Company Operates another two Offshoot brands Abercrombie Kids and Hollister for teenagers

Main aim of this project is to automate the existing web application regression suite and run the test scripts for every new build by designing the complete framework and the objective of introducing a test automation tool by the Abercrombie business team is to reduce the time to fetch test execution results and to uncover any defects in an optimal time as well as to execute less prioritized brands and countries.

Roles & Responsibilities:

- Understanding requirements, analyzing Manual Test cases, and identifying scope of the test case to automate.
- Involved in Identifying the E2E scenario & Creating the Reusable methods, Generic methods & Page Factory.
- Developed new scripts for the regression and sanity testing using **Selenium with Java**
- Prepared and executed batch test suite through TestNG Grouping
- Verify the Automated Test Result and Logging the Defect in JIRA and updating status to the higher management.
- Test Execution for different country environments using browser Mod headers.
- Verifying Test result and logging defects.

Project 2:

Title :DSP – Digital Selling Platform (mPOS)
Client : Abercrombie & Fitch and Hollister -US

Description:

The DSP project will create and deliver a mPOS (Mobile Point of Sale) solution that will enable associates with the ability to scan "In-Store items", "Accept payment"&"Print receipts" out on the sales floor using a device that fits in their pocket (Honeywell EDA50/ EDA51), this will enable the associates with the ability to bust the busy lines that form around the traditional registers today.

Roles & Responsibilities:

- Responsible for analyzing requirements, designing, and testing the application.
- Installing required version apk to perform regression.
- Responsible for validating the results and rising defects according to the results.
- Performing Regression testing, Ad-Hoc testing, Sanity/Smoke Testing for each Release.
- Validation of different types of tenders, tax differences and split sales.
- Performed different types of In-store Sales, DTC Sales, POP-INS, PUDO's and SFS.
- Attending daily status calls with client to discuss about defects status and clarifications on requirements.
- Reporting and Tracking Bugs to closure.
- Knowledge sharing with new resources.
- Validating Promotions, Payments for each new release.
- Validated different types of Payment Gateway, Tenders types like Cash, credit, Gift, merch.

Project 3:

Title : IPOS (Integrated Point Of Sale)

Client : Abercrombie & Fitch and Hollister -US.

Description:

IPOS is customized A&F retail point of sale software that is being used in every A & F and Hollister Store Sale registers. It has over 300 locations in the United States and is expanding internationally. This application is operated over 18 countries with different languages. Same application can support all the languages and environments.

A POS or Point of Sale software is a vital solution for retail businesses to carry out retail transactions effortlessly from anywhere. On POS devices, we performed integration of Sales with OMS applications, generating invoice, returns and exchanges. Also, we check Data Flow to the Central office through regionals from Local Database of POS systems.

Roles & Responsibilities:

- Responsible for analyzing requirements, designing, and testing the application.
- Building both PXE & register to perform regression.
- Responsible for validating the results and rising defects according to the results.
- Performing Regression testing, Ad-Hoc testing, Sanity/Smoke Testing for each Release using the POS devices and OMS application for Abercrombie and Fitch
- Validation of different types of tenders, tax differences and split sales.
- Performed different types of In-store Sales, DTC Sales, POP-INS, PUDO's and SFS.
- Performing Store builds and zypper-ups.
- Attending daily status calls with client to discuss about defects status and clarifications on requirements.
- Reporting and Tracking Bugs to closure.
- Knowledge sharing with new resources.
- Validating Promotions, Payments for each new release through automation and manual.
- Validated different types of Payment Gateway, Tenders types like Cash, credit, Gift, merch.
