

Pavithiran S

Present Address:

40 Sivanthi avenue, Nerkundram, Chennai-600107

Email: selvarajpavithiran@gmail.com

Mob no: +91-9489192289

Personal Profile: Male, Indian, Married

Current CTC : 4.8 LPA

Profession: R&D Engineer(Medical devices),
HCL Technologies

Date of Birth: 9th May 1995

Professional Summary

- Having 3+ Years of professional work experience in Engineering Design & Medical devices and managing products right from development to delivery encompassing in various phases of product lifecycle PLM Implementation organization management.
- 1.5+ Years of experience in the Manufacturing Domain as Machine operator, Quality assurance & Quality control roles with all quality operations.
- Design Release/Bill of Material (BOM) creation/Drawing release to Production/ Technical documentation/taking care of Engineering Change Orders (ECO) until released.
- Experienced in the Industrial Engineering and Quality Control of an organization.
- Hands on experience in medical device related standards and regulations such as follows **ISO13485**- Medical Device QMS, **ISO 14971**- Application of Risk management.
- Experience in leading the Design History File (DHF) remediation project – worked with diverse technical team to create, update and maintain design control documents as a part of medical product design team.
- Have excellent analytical, problem solving, communications, and interpersonal skills with ability to interact with individuals at all levels.
- Ability to lead and take challenges.
- Ambitious and hardworking, with a commitment to excellence and an urge to learn.
- On the go attitude and the ability to work in a fast-paced, collaborative environment.
- Exposed to complete Lifecycle design control process and procedures of medical devices
- Insatiable thirst to learn new things and to enhance comprehensive problem solving abilities.

Technical Skills

CAD Tools	SolidWorks Proficient
PLM Tools	JDE, SAP-Everest, Agile Applications
Other Tools	Master control

Career Profile

- Worked at Qh Talbros Ltd, Chennai as Production and Quality control engineer from Apr-2017 to May 2018
- Worked at Kumar industries, Ambattur as Quality control Engineer for six months.
- Presently working as Research and development engineer at HCL Technologies from April 2019 to till date.

Qualifications

SL.No	Courses	University/institution	Passing Year
1	B.E/MECH	Sethu institute of technology	2016
2	HSC	Star Matriculation	2012
3	SSLC	St Josephs Matriculation	2010

Project Details

Project Title 1 : Production engineering

Organization : Qh Talbros Limited (Production engineer)

Duration : April 2017 to May 2018

Tools: Different fixtures for Machine settings, CNC machine program, Gauges

Project Description: Daily production of Ball pins and housings.

- Attained high output in machines, performing Induction hardening, Drilling, Ball turning & Burnishing, milling and CNC operations etc.
- Specialized First off approval for Ball turning burnishing, Drilling, Induction hardening, milling etc,
- Simultaneously working towards productivity and quality improvement
- Keep up KAIZEN activities 5s and poke yoke.
- Daily monitoring process audit, solving quality issues.
- Analysis of internal and external customer complaints, action plan system by upgrade.

Project Title 2 : Quality engineering

Organization : Kumar industries (Quality control)

Duration : May 2018 to October 2018

Tools: Profile projector and other inspection tools

Project Description: Daily quality operations, daily monitoring and report preparation to meet periodic customer audit.

- Quality inspection of highly precision brake components such as sliding pin, adaptors etc.
- First off evaluation to initiate production of all parts operations.
- Specification control by various inspection tools and gauges such as profile projector, vernier caliper, Dial calipers etc, periodically.
- Customer audit preparation and compliance during the periodic audit.
- Rejection maintenance by analyzing the product and process supervision.

Project Title 3 : ITL (Infusion test lab)

Organization : HCL Technologies (Lab technician)
Duration : April 2019 to November 2019

Tools: Product and process measuring instruments and devices

Project Description: Executing the Product and process related tests and reporting the test case observations

- Performed Test Case Preparation, Test Case Execution and Defect tracking.
- Good knowledge in Functional Testing, Retesting, and system Testing.
- Experience in preparing Weekly status reports and Daily status reports.
- Strong Communication, Interpersonal, learning and organizing skills matched with ability to manage with stress, time effectively.

Project Title 4 : MDR remediation

Organization : HCL Technologies (R&D Engineer)
Duration : November 2019 to March 2020

Tools: SAP Everest, MS office

Project Description:

Project is related to Medical device labelling. We will work on all level of the medical device labelling according to MDR requirements.

Roles and Responsibilities in the Project:

- MLGA preparation – Master labelling gap assessment
- ACR Creation (ACR draft, QA Review and ECR strategy finalization)
- LCR Creation (Graphics Redline, Mockup Creation and Proof reading)

Project Title 5 : Product Stewardship

Organization : HCL Technologies (R&D Engineer-Materials engineering)
Duration : March 2020 to September 2021

Tools: JDE, MS office, Supplier communication

Project Description:

Project is focused on Medical device materials. We will work for regulatory requirements of materials in which the medical devices produced and supporting & finally collecting all the information in database.

Roles and Responsibilities in the Project:

- Performed material assessment such as analysis and scoping of BOMs collected from JDE & other resources.
- Established supplier contact and collected the material information(Regulatory purposefully) for different products
- Verifying and updating material information collected from suppliers and updating the database.
- Possessing good project management, communication, and interpersonal skills.

Project Title 6 : Hearing aid project

Organization : HCL Technologies (R&D Engineer- Quality Assurance)

Duration : September 2021 to Till date

Tools: Solid works, MS office

Project Description:

The project is related to hearing aid device. Working in controlling all mechanical documents based on ISO 13485 requirements.

Roles and Responsibilities in the Project:

- Control of documents by reviewing and analyzing the process flow
- Proposing, issuing and reviewing document identification, change and defect forms with all the analysis and evaluation report. Then proceed for authorization.
- Working with all the forms, templates, review record, checklist, Mechanical drawings (Solidworks), and ensure correct design transfer takes place.
- Managing the design team for their request of review of various documents for releasing the same for approved usage.
